Village of Mayville Seeking Community Input for NY Forward Application

The Village of Mayville is exploring the opportunity to apply for New York State's NY Forward Program, which provides funding to help strengthen downtown communities through strategic investments and revitalization projects. The program supports projects that can enhance public spaces, improve infrastructure, encourage business growth, increase housing opportunities, and improve overall quality of life.

As part of the application process, we're asking residents, business owners, property owners, and community organizations to help identify potential projects and priorities that could benefit the community. Public participation is a key component of developing a competitive application and creating a shared vision for Mayville's future.

Community members interested in contributing ideas or learning more about the NY Forward Program are encouraged to contact the Village Office or see the **informational sheet** about the program. The Village has a **Project Interest Form** for residents, business owners, property owners, and organizations to submit ideas for projects that could be included in the NY Forward application. Completed forms may be returned to the Village Office for consideration as part of the application planning process.

The Village encourages everyone with ideas for improving and strengthening the community to participate in this important planning effort.

Save the Date: We are hosting a public meeting regarding our NY Forward application on **Wednesday, October 7th**. Please stay tuned for additional details coming soon.

Board of Trustee Members
